Summary

B.Pharm undergraduate with a strong academic foundation in pharmaceutical sciences, pharmacology, and healthcare systems, complemented by hands-on experience in full-stack web development. Proven ability to build scalable digital platforms, manage databases, and apply technology-driven solutions in healthcare and information systems. Highly motivated to build a career at the intersection of pharmacy and technology.

Experience

- Developed and maintained responsive web applications using PHP, JavaScript, HTML, and CSS.
- Performed code reviews to ensure code quality, performance, and best practices.
- Troubleshoot and resolved application issues during maintenance and production phases.
- Managed and optimized SQL and NoSQL databases to improve application performance.
- Collaborated with developers on feature development, bug fixing, and system optimization.
- Provided technical support to clients, resolving network and application-related issues.

Skills

- Full-Stack Web Development
- Backend: PHP, Python
- Frontend: HTML, CSS, JavaScript, Bootstrap
- Database Management: PostgreSQL, MySQL, SQL & NoSQL
- Version Control: Git & GitHub
- Problem Solving & Debugging
- Customer & Technical Support

Projects

- School Websites – Built and deployed multiple websites for schools and private institutions, contributing to improved client trust and long-term partnerships.
- HeadlineHub – Developing an AI-powered news publishing platform with automated content collection, processing, categorization, and publishing using Python, PHP, and PostgreSQL.
